RENTMOOLA™

INTERMEDIATE-SENIOR DEVELOPER

Building the rent payment network for all and changing the way you pay rent!

We know paying rent by cheque is a huge pain, and we simplify the process for both property managers and their tenants and love to do this through technology! We are disrupting the status quo of rental payments by making the transaction paperless and rewarding for tenants, and the process of working with us seamless for our property management clients by giving them a secure online platform to collect rent online.

If that wasn't enough, we were a finalist in the Deloitte Technology Fast 50 Awards, the winner of the NextBC Most Disruptive Innovation Award, and the winner of the Metabridge Start-Up of the Year Award, to name a few.

Now is the time to join us as we focus on launching new products and scale our business and client base.

YOUR ROLE

We are seeking an Intermediate-Senior Developer to join our diverse, self-motivated and supportive team.

As part of our Development team, you will play a critical role in maintaining and developing our PCI-compliant payment platform. Reporting to the CTO, you will be tasked with both front and back end development tasks to help ensure the best user experience possible.

RESPONSIBILITIES:

- 4+ years with Java EE
- Working knowledge of CSS, JavaScript, HTML, MySQL / PostgreSQL
- Experience building restful web services
- Strong object oriented design and programming skills
- Strong verbal and written communication skills
- Self-motivated and eager to learn
