RENTMOOLA™
SENIOR JAVA DEVELOPER

Building the rent payment network for all, and changing the way you pay rent!

We are disrupting the status quo of rental payments by making the transaction paperless and rewarding for tenants, and seamless for our property management clients by giving them a secure online platform to collect rent online. It seems that the property management industry was ready for us, because we are seeing huge growth across North America and next year plan to expand aggressively into the U.S. market. Last year over $300 billion of rent was paid in the U.S. market by check and cash.

If that wasn't enough, we were a finalist in the Deloitte Technology Fast 50 Awards, the winner of the NextBC Most Disruptive Innovation Award, and the winner of the Metabridge Start-Up of the Year Award, to name a few.

Now is the time to join us as we focus on launching new products to drive new revenue opportunities, and as we scale our business and client base.

YOUR ROLE

Our Senior Java Developer will play a critical role in maintaining and developing our pci compliant payment platform. Reporting to the CTO, you will be tasked with both front and back end development tasks to help ensure the best user experience possible.

RESPONSIBILITIES:

- Review current systems
- Present ideas for system improvements
- Produce detailed specifications and clean and maintainable code
- Test the product in controlled, real situations before going live
- Maintain the systems
- Provide scheduled after hours system support

EDUCATION AND/OR EXPERIENCE:

- 5-8 years Software Development experience
- Excellent communication skills
- Previous QA experience
- Calm under high pressure situations
- Previous experience writing requirements documentation
- A keen ability to quickly prioritize and react to changing market dynamics and communicate priorities to key stakeholders
- Are able to work in a fast-paced, collaborative environment under tight deadlines
- Have a high level of energy passionate about payment systems

TECHNICAL SKILLS:

- Java EE
- Wild y
- Amazon Web Services
- JSF2
- CSS 3
- Javascript
- Hibernate / JPA
- HTML5
- MySql
- GIT
- Rest Web Services
- AngularJS

TO BE A TOP CANDIDATE:

- Excellent grasp of real estate and credit card industries
- Good understanding of PCI compliance
- Experience working with complex desktop and mobile payment systems
- Interest in working in a start-up environment
- Experience with DevOps practices
- Experience with micro services and/or distributed systems

WHY WORK HERE?

- Exciting start up atmosphere with room to grow and develop
- Open and accountable environment
- 4 weeks' vacation
- 1 block from Burrard Skytrain
- Competitive salary
- Comprehensive health benefits package
- Professional development allowance through our MoolaIQ program
